Project Team

Tom Mank, ITCTC
Julie Bednar, Department of Transportation, Region 3
Kent Johnson, City of Ithaca
Jerry Stern, Tompkins County Highway Department

Financial Assistance for this study was received from the Federal Highway Administration, the New York State Department of Transportation and Tompkins County.

Summary

This report includes AADT (Annual Average Daily Traffic) and peak hour (5-6 PM) traffic count information for the state, county and local roads in Tompkins County for which traffic count data was obtained in 2014 and 2015. Count locations in this report are different from those provided in the 2006-2013 Traffic Count Reports.

Data Description

Traffic count data for 18 state, 31 county, 56 local road segments, and 2 private roads (totaling 107) are included in this report. Of these, 12 counts were taken by the Tompkins County Highway Department and 6 counts were taken by the City of Ithaca. The remaining 89 counts were taken by the New York State Department of Transportation (NYSDOT). The traffic counts in this report represent the combined total of all lanes of traffic on each road. Therefore, both directions of travel are combined on two-way roads.

There are four traffic count tables in this report. All four traffic count tables present the same data, each sorting the data differently. In the first table (pages 6 thru 8), the data is sorted by an alphabetical listing by road name. In the second table (pages 9 thru 11), the data is categorized in numerical order by road number. In the third table (pages 12 thru 14), the data is sorted by municipality. In the fourth table (pages 15 thru 17), the data is sorted by count source with the local roads first, followed by the county roads, followed by the State roads. Following these four traffic count tables there is a short table showing the bicycle and pedestrian counts taken in 2014 and 2015 (page 18).

The report includes the following data (column header descriptions are shown in **bold**):

Station#:

The number of the Traffic Count Station where the count was measured. The State station numbers are the last 4 digits as shown on the actual traffic count. The county and City of Ithaca station numbers were taken, wherever possible, from the NYS DOT's Local Highway Inventory (LHI) count designation for that road segment link. If there was no previous count designation assigned, new numbers were designated by ITCTC (86XX for the County and 88XX for the City of Ithaca).

Road #:

County roads are listed with the County Route (CR) number as a prefix. State roads are listed with the State Highway (NY) number as a prefix. Local roads are listed with their LHI designated road number.

Count Location:

The name of the road where the traffic count was measured.

Municipality:

The city, village or town where the count was measured. The prefix “C/”, “V/” or “T/”, indicates city, village or town, respectively.

From / To:

A description of the road segment’s beginning and end describing where the count was measured. Where possible this description matches the NYS DOT’s Local Highway Inventory information.

Source:

The name of the organization performing the count.

AADT:

The annual average daily traffic (AADT) is the number of vehicles that would be assumed counted on a “typical” day of the year. Based on established formulas, a measured traffic count is factored to an AADT by adjusting it for seasonality and vehicle classifications. Adjusting for seasonality is necessary because each season undergoes an increase or decrease in traffic volumes. Counts are adjusted for vehicle classifications since trucks with three or more axles appear as several cars to the counters.

5-6 PM:

For the purpose of this report, the PM peak volume was selected to be between the hours of 5:00 PM and 6:00 PM. Actual PM peak volumes may be higher on some roads at a different hour interval.

Time:

The month of the year that the 2014 or 2015 count was taken.

Last Ct:

The AADT of the most recent count taken on the same road segment as the 2014 or 2015 count.

Year:

The year of the most recent count taken on the same road segment as the 2014 or 2015 count.

1st Ct:

The AADT of the earliest count taken on the same road segment as the 2014 or 2015 count.

Year:

The year of the earliest count taken on the same road segment as the 2014 or 2015 count.

Change:

The % increase or decrease in AADT when comparing the most recent count to the earliest taken on the same road segment.

Map Description

The maps on pages 19 through 25 show the locations where the traffic counts were taken. Map 1 shows the locations of road counts in the Towns of Ulysses and Lansing and the Villages of Lansing and Trumansburg. Map 2 shows the locations of road counts in the Town of Groton and the Village of Groton. Map 3 shows the locations of road counts in the Town of Dryden and the Village of Freeville. Map 4 shows the locations of road counts in the Towns of Danby and Caroline. Map 5 shows the locations of road counts in the Towns of Newfield and Enfield. Map 6 shows the locations of road counts in the Town of Ithaca and the Village of Cayuga Heights. Map 7 shows the location of road counts in the City of Ithaca.
